- PRODUCTION OF GOODS AND SERVICES
E.E.T 2 'ING EMILIO REBUELTO' (Jan 2006 - Dec 2008)

PROJECTS WORKED ON

- RUSSIA VS UKRAINE - Analysis in R
Personal on KAGGLE
This project describes the equipment losses, number of dead, military wounded and prisoners of war of the Russians in the Russian war in Ukraine in 2022.
- PREDICTING CREDIT CARD APPROVALS
Personal on KAGGLE
Commercial banks receive a lot of applications for credit cards. Many of them get rejected for many reasons, like high loan balances, low-income levels, or too many inquiries on an individual's credit report. In this notebook, we will build an automatic credit card approval predictor using machine learning.
- THE ANDROID APP MARKET ON GOOGLE PLAY
Personal on KAGGLE
Mobile apps are one of the fastest-growing segments of the Android market... the number of people using Android devices has increased by more than 50% in the last two years. We'll look for insights into the data to devise strategies to drive growth and retention.
